linkedin.com/in/sauravkumar0907

DevOps Engineer with hands-on experience in AWS, Docker, Kubernetes, Jenkins, GitHub Actions, SonarQube, Prometheus, Grafana, and CloudWatch. Skilled in building CI/CD pipelines, Infrastructure as Code (IaC), container orchestration, cloud automation, and production monitoring. Passionate about implementing DevOps best practices to deliver scalable, reliable, and secure cloud-native applications.

AREAS OF EXPERTISE

Cloud: AWS (EC2, VPC, ALB, EKS, ECR, RDS, Aurora, S3, IAM, CloudWatch, SNS, Auto Scaling)

Containers & Orchestration: Docker, Kubernetes, Helm

CI/CD & GitOps: GitHub Actions, Jenkins, ArgoCD, SonarQube

Monitoring & Alerting: Prometheus, Grafana, Amazon CloudWatch, Amazon SNS

Infrastructure as Code: Terraform, AWS CloudFormation

Scripting & Languages: Python, Bash

Operating Systems: Linux (RHEL, Ubuntu)

Version Control: Git, GitHub

PROJECTS

AWS 3-Tier Web Application Architecture | *EC2, VPC, ALB, Auto Scaling, Aurora MySQL, IAM* | [GitHub](#)

- Designed and deployed a highly available 3-tier web application on AWS following the Well-Architected Framework for security, scalability, and high availability.
- Built a custom VPC with public and private subnets across multiple Availability Zones; configured Internet Gateway and NAT Gateway for secure connectivity.
- Configured an Application Load Balancer (ALB) to distribute traffic; deployed Web Tier in public subnets and Application Tier in private subnets with Auto Scaling Groups.
- Provisioned Amazon Aurora MySQL with Read Replica and implemented secure networking using Security Groups, IAM Roles, and Route Tables.

End-to-End CI/CD Pipeline with SonarQube on AWS EKS | *GitHub Actions, Docker, ECR, EKS, SonarQube* | [GitHub](#)

- Designed an end-to-end CI/CD pipeline using GitHub Actions to automate build, code quality analysis, containerization, and deployment on Amazon EKS.
- Integrated SonarQube for static code analysis and enforced Quality Gates as a mandatory step before Docker image build.
- Automated Docker image build, versioned tagging, and push to Amazon ECR; deployed to EKS using Kubernetes manifests with zero-downtime rolling updates.
- Secured sensitive credentials using GitHub Secrets and AWS IAM best practices; validated deployments via `kubectl` rollout status and pod health checks.

Production Monitoring & Alerting on Amazon EKS | *Prometheus, Grafana, Helm, CloudWatch, SNS*

- Designed and implemented a production-grade monitoring and alerting solution for applications deployed on Amazon EKS.
- Deployed Prometheus and Grafana on Kubernetes using Helm; configured Prometheus to scrape metrics from Pods, Nodes, Deployments, and Services.
- Created interactive Grafana dashboards to visualize CPU, Memory, Network, Pod, and Node performance metrics in real time.
- Integrated Amazon CloudWatch and SNS for automated alerting on critical infrastructure events; validated monitoring through load testing.

TRAINING & APPRENTICESHIP

DevOps Engineer Training & Apprenticeship

Grass IT Solutions

Jan 2026 – Jun 2026

Ahmedabad, Gujarat

EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science – CGPA: 7.85/10

Bhopal, MP

2021 – 2025
